DANIELLE & ELI

Danielle and Eli started dating when they were in the 8th grade. They hurriedly purchased their first home four years ago while the market was in the middle of a housing shortage and did not think through all of the issues. When Danielle warns Eli about the busy road and the noise of the construction of the high school next door, Eli looks to the future convenience of walking to school. Eli loves the privacy, the lot and the area. He thinks that by adding square footage and reconfiguring some spaces, this house can be perfect for their expanding family. Danielle, on the other hand, is ready to move. Now that they've added twin boys to the family, she knows they will need even more space. Danielle wants a larger, more functional home to accommodate their family and working from home. She knows Hilary can find them something better.
